1.Chapter One Installation and Login

• One-click installation: Double-click the exe installation file and follow the installation instructions for quick installation.

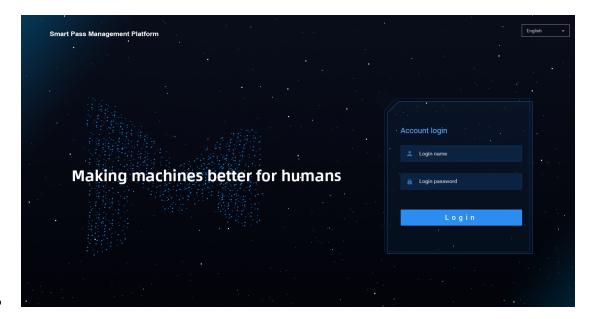

Please Note:

TIPS application doesn't contain any malicious code that harm your Windows system. Please give confirmation to proceed, if the installation process is being intercepted by any antivirus software!

Confirm

Note: If the installation process is blocked by a system firewall or third-party antivirus software, always choose to allow the program to operate. Otherwise, the installation process may fail and become unusable.

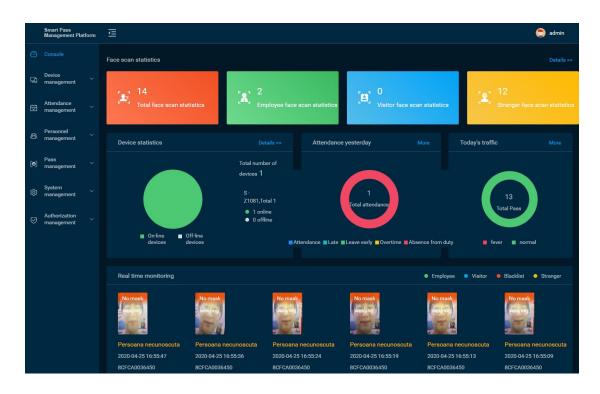

- After the program is installed, the application service is automatically started by default.
- After the start-up is complete, click the "Copy" button. Open the chrome browser and paste the link to open the application service background. Enter your username and password to log in. (The default user name: admin password: 123456)

• Application system upgrade: You only need to overwrite and install the application system software version installation package higher than the current version.

2. Chapter Two Console

It provides an overview of the number of devices and online status; statistics on the face scan (total face scan, employee face scan, visitor face scan, stranger face scan); today's pass and real-time monitoring (employees, visitors, blacklists, and body temperature); and provides quick access to view details.

3.Chapter Three Device Management

3.1 Device list

[Device List] It contains information of all the devices connected to the system. You can perform single,

3.1.6 Auto-start

Auto-start: When enabled, the application will start at start-up, and when it is closed, it will not start at start-up. In [Device list], select the devices that need to be set to start automatically, and click the "More-Auto-start" button to enable or disable this function.

Auto-start settings		\times
Auto start:		
	Cancel	Sure

3.1.7 Application daemon

Application daemon: When this function is enabled, the application will automatically jump back to the playback interface within 1 minute after exiting the application page. When it is disabled, it will not automatically jump back. In [Device list], select the devices that need to set application daemon, and click the "More-Application daemon" button to enable or disable this function.

Application daemon settings	×
Application daemon:	
	Cancel Sure

3.1.8 Open the door remotely

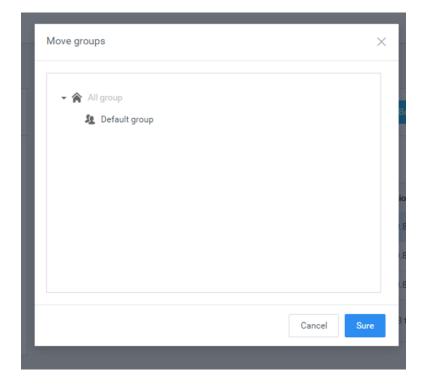

After corresponding to the device records in [Device list], click the "Open the door remotely" button to open the corresponding gate.

3.1.9 Delete

Select the device to be deleted in the [Device list] and click the "Delete" button to complete the delete operation. Only offline devices are supported. It supports single or multiple device operations.

3.1.10 Move group

In [Device list], select the devices that require mobile grouping, and click "Mobile Grouping". In the pop-up window, select the target group you want to move to, and you can complete the group move operation after you confirm it. It supports single or multiple device operations.

3.1.11 Personalize list

The information displayed in the list can be selected as needed in the Personalize list.

3.1.12 Device details

The device details include basic information, device settings, and remote operation.

• Basic information: View device information, edit device name, device address, etc.

If there is no device under the selected group, a prompt will pop up: there is no device under the selected group, please select again. If there are devices under the selected group, the original settings will be overwritten after the batch setting is prompted.

3.1.15 Device grouping management

Device grouping uses structure grouping by default. Each user group has a default device group. You can add, modify, and delete device groups on the user group. The operation is similar to the user grouping in [Group structure].

3.2 APK list

[APK list] The page contains client software list information and software version upload and delete operations.

3.2.1 Delete APK

Select the software version to be deleted in the APK list, and click $\mbox{\ensuremath{^{ll}}}$.

4. Chapter Four Personnel Management

4.1 Employee list

The employee list is used to manage employee information, such as viewing, adding, editing, and exporting employee information. Employee information can be added individually or in bulk. The batch adding operation requires information import in bulk first, and then portrait import in bulk.

All group (124)	Ref	iresh			Please enter	r personnel ID, narr	e or phone number for fuzzy o	query. Q
 2 Default group (4) 2 视美泰公司员工 (120) 		Portrait photo	Employee ID	Name	Phone number	Email	Creation time	Operate

			192	杨鹏程	13590289322		2020-04-08 11:06:10	E

4.1.1 Add employee information individually

Steps:

- 1) In [Employee list], click the "Single addition" button to enter the employee addition page;
- 2) Fill in the personnel ID, name, gender, belonging group, phone number, ID card number, IC card number, nationality, place of birth, date of birth, contact address and notes. Add a face recognition photo and click "Save" to complete the employee creation operation.

Smart Pass Management Platform User Manual

* Personnel ID:	Only supports numbers and in 1 ~ 9 characters	
* Name:	Support Chinese, English, numbers and in 1 ~ 32 characters	
Genders:	Please make a selection.	
Face recognition portrait:	 Please choose a front-and-bareheaded photo in the past three months, with clear and even-light image.; The recommended size is 640 px * 480 px, and the size does not exceed 500kb. Only jpg and png file formats are supported.; Faces should account for more than 1/3 of the photo to avoid photo blurring, wearing sunglasses, excessive beauty, head rotation, etc., 	
	Portrait photo	
Belonging group:	Upload from local Register from device Please make a selection.	
* Phone number:	Please enter your phone number, the format is "+ xx-xxxxxx" abroad.	
Email:	Please input your email	
ID number:	Support numbers, letters and in 15 or 18 characters	
IC card number:	No more than 64 characters	
Native place:	No more than 64 characters	
Date of birth:	Please make a selection.	
Contact address:	No more than 128 characters	
Note:	No more than 128 characters	

Upload a face recognition photo description

> Upload from local

Click "Upload from local" to open the local folder, select the jpg and png portrait photos in

the folder.

Note: Portrait photo specifications

1. Please choose a front-and-bareheaded photo in the past three months, with a clear and even-light image.

2. The recommended size is 640 px * 480 px, and the size does not exceed 500kb. Only jpg and png file are supported.

3. Faces should account for more than 1/3 of the photo, avoiding photo blurring, wearing sunglasses,

excessive facial-up, and head rotations.

> Register from device

Click "Register from Device" to open the Select Device window and select an online device. Once determined, the device will enter the photo state. After the photo is taken and verified, the photo will be sent back here from the client.

4.1.2 Import employee information in bulk

Steps: In the [Employee list], click the "Add in Bulk - Information Import in Bulk" button.

- 1) First step, click "Download Template". Download the excel template file to your computer with the file name "Personnel import template.xls". Then fill in the employee information in bulk.
- 2) In the second step, click "Upload excel file". Select the excel file with the employee information filled in and upload it. If the file is uploaded successfully, the upload success status and file name will be displayed.
- 3) In the third step, click "Start import". During the import, there will be a progress bar showing "Importing personnel information (1 / total number of people)". After the import is completed, it prompts "Successful batch import of personnel information". After the import is completed, return to the [Person List] to view the imported personnel information.

1	👱 Download template	Import in bulk
	Download the Excel template, fill in the employee information and upload in bulk.	
2	1 Uploed Excel file	
	The uploaded Excel file cannot exceed 2M, and only supports the .xls file format.	
3	E Start Import	
	After the import is completed, you can view the imported personnel information in the personnel list.	

Description of import method

- Import without overwriting: When importing a file two or more times, duplicate employees are not imported. And the system will prompt abnormal duplicate information.
- Overwrite import: The second import will overwrite the information of the employee that was imported for the first time without prompting for duplicate information.

Description of import failure exception

- The content or format of the uploaded excel file is incorrect and does not meet the template specifications. Click to start the import, and a prompt will appear: "The file content or format is incorrect.
 Please fill in the employee information according to the template requirements."
- A field in the employee is malformed or should not be duplicated. After the import fails, the reason for the failure will be notified in a table. After modification, you can re-import.

4.1.3 Import portrait photos in bulk

Steps: In the [Employee list], click the "Add in bulk - Portrait import in bulk".

- Step 1, click "Zip file selection" to open the Select Folder window and select the file upload.
 After the file upload is successful, the current file storage path is displayed.
- 2) Step 2, click "Start Import", and a progress bar will be displayed during the import: the number of imported files / the total number of folders. And there will be a prompt message: x sheets have been successfully imported, x sheets failed. After the import is complete, the progress bar displays: The portrait photos in this folder have been imported.

onnel manageme	ent / Personnel list / Import in bulk
Portrait import	rules:
2、[Format size li	aming] The naming of the portrait file needs to correspond to the personnel ID. After the upload is successful, the corresponding person portrait information can be viewed in the person list. mitation[] Only supports zip files, and the size of each portrait file must not exceed 500K. Files that do not meet the requirements will not be imported; icition] Faces need to account for more than 1/3 of the photo. Please choose a fromt-faceless photo in the past three months. The avatar is clear and the light is uniform. Avoid the avatar cannot be us on.
1	➢ Zip file selection
	Zip the named portrait photos in a specified folder, then select this zip file for import.
2	E Start import
	After importing, you can view the imported portrait information in the personnel list.

Description of portrait import rules:

- [Portrait file naming] The naming of the portrait file needs to correspond to the personnel ID. After the upload is successful, the corresponding person portrait information can be viewed in the person list.
- [Format and size] Only two file formats of jpg and png are supported, and the size of each portrait file must not exceed 500k. Files that do not meet the requirements will not be imported.
- [Portrait Restriction] Faces need to account for more than 1/3 of the photo. Please choose a

front-facing photo in the past three months. The avatar is clear and the light is uniform. Avoid the avatar that cannot be used for face recognition.

• [Select Folder Upload] After the above conditions are met, place the named portrait photos in the specified folder and select the folder to import.

Description of failed portrait import

• If the size of an image file does not meet the requirements, the import will fail. After that, a table will appear to display the information of the portrait file that has not been successfully imported. After modification, you can re-import.

4.1.4 Export employee information

In [Employee list], click the "Export" button to export all employee information in the list to the file "Employee Information.xls" and download it.

4.1.5 Refresh employee information

In [Employee list], click the "Refresh" button to refresh all employee information in the list to the latest state.

4.1.6 Staff details and editing

• Employee details

In [Employee list], after corresponding employee information, click the "Employee details" button, you can enter the details page to view specific employee information.

5.3.3 Remove monitoring

In the blacklist monitoring personnel list, you can click the "remove monitoring" button behind the list record to release monitoring. After the removal is successful, the blacklist removes the snapshot monitoring or alarm from the selected device. You can also check the personnel record and click "remove monitoring" to perform batch operations.

			2 tot	al 10Note/Page 👻 🤘 🗧 1/1 🕞	» 1 Page Ju

6.1.1 Attribution of business data

- Various business data generated by enterprise users will only be stored under the group structure group in the enterprise where they belong, and all business modules in the enterprise are grouped using the same group structure.
- In the same enterprise organization structure, users at a high level can access business data in a low-level structure. Conversely, low-level users cannot access high-level business data, and other companies cannot access this data.
- In the same enterprise group structure, business data between groups is visible within the group.
- An enterprise administrator can manage all business data in the organization structure of the enterprise, but cannot access data of other enterprises.

6.1.2 Group management

• Create a group: select a group and click + to enter the [New Group] page. On this page,

you only need to fill in the group name and save it.

- Modify and delete operations: (omitted)
- Group permission description: visible in the default group

6.2 Role management

[Role management] It is used to create and manage roles. Roles are used to control various business function modules and function operations of users in the system. It is composed of different function operation rights.

- Description of roles
- Each enterprise can create one or more roles with different permission scopes, which are used to perform different functions for different users in the enterprise group structure.

Role information is independent between enterprises and cannot be accessed by each other. Note: The role of admin is the system super administrator, which can manage all the functional modules and business data in the system. Among them, the functions of [System Settings] and [Enterprise Management] can only be managed by admin users, other users cannot see these two modules, including enterprise administrator users.

Role creation

Go to [Permission Management]-[Role Management], click the "Add Role" button to enter the [Add Role] page.

System manageme	nt / Role management / New role	
* Role name:	Chinese, letters, numbers, horizontal lines, underscores and in 1–32 characters	
* Role permissions:	All permissions	
	Device list Personnel list Visitor management Blacklist management Pass records Pass permission Blacklist monitoring Permission records System log System log System log System log System log	
	Submit	

6.3 Business management

[Enterprise Management] The module can only be operated by the super administrator and is used to create and manage enterprise accounts in the system. Each corporate account has corporate administrator rights and can be used to log in to the system. After logging in to the system, the account can manage the organizational structure, users, and roles within the enterprise, and can view and manage all business data created by the enterprise users. But there is no operation authority for the [System Settings] and [Enterprise Management] functions, nor can you see the data of other enterprise users.

Super administrators can create, modify, query, and delete enterprises, as shown in the following figure:

System management / Busines	ss management				New company
			Enter company code for query.	Enter company name for query	Q
Company code	Company name	Administrator name	Phone number Cr	eation time	Operate
5512350078915751	视美泰测试	smt	20	20-04-08 10:59:44	1
			1 total 10Note/Page 👻 <	< 1/1 > > 1	Page Jump

Note: Enterprise delete operation is supported. After deleting an enterprise, all data associated with the enterprise will be deleted, and the devices under the enterprise will belong to the admin default group.

6.4 System log

[System Log] The system log list on the page contains the user's operation date, function modules, log details, operation results, operator and other information records during the use of the system.

I he operation log only re	cords important operations, not a	user actions.

	Public holiday / holi	day work time is at least 1 O counting as overtime.	minutes and work time is earlier than	 and work time is 	
				Cancel	

Shift name

1) The name can be customized to enter no more than 32 characters.

Shift settings

- 1) The default is one shift. You can click the Add button to add shifts and set up to 4 shifts.
- 2) You can select / clear / customize the specific working / off time within the time period.
- 3) You can select and customize the minutes limit for late arrival and early departure in the notes.
- 4) Click the delete icon in the operation to delete this shift.

• Overtime rules

5)You can manually enter and select the length of time required to work overtime on workdays

2) You can manually enter the length of time required for overtime on public holidays and holidays, as well as working time and off time.

7.1.2 Holiday settings

Click New holiday to customize the time period of various holidays. Click the Modify to modify the parameters of the currently set holiday. Click the delete to delete the current holiday.

Shift setting Holiday settings	Public holiday settings Device group settings		
New festival			
Festival name	Start and end date	Notes	Operate
	No D	lata	

New holiday

Click New holiday to open the new holiday interface.

New festival		×
Festival name:	No more than 32 characters	
Start and end d	ates: Start date 📋 to End date 📋	
Notes:	No more than 50 characters	4
	Cancel	

Holiday name

The name can be customized to enter no more than 32 characters.

• Start date & end date

The start date and end date of the newly added holiday can be customized.

• Notes

It can be customized to enter no more than 50 characters to explain the holiday.

7.1.3 Public holiday settings

You can customize the fixed weekly rest days (Monday to Sunday). Click the Modify to modify the parameters of the currently set public holiday. Click the Delete to delete the current public

holiday.

Attendance management / Attendance rules		
Shift setting Holiday settings Public	holiday settings Device group settings	
New public holidays		
Public holiday name	Off day	Operate

	s	2020-04-19 Playday	Default group	111					0
	уд	2020-04-19 Playday	Default group	1					0

• Employee grouping list

1) In the list, the group name and group information are the same as the group data in [Employee list], which is synchronized in real time according to the data changes in the employee list. After selecting all groups, the attendance records of all employees are displayed on the right side of the interface. In the sub-group, only the attendance records of the employees in the group are displayed.

• Attendance records list - Employee name, Employee ID, Employee group

1) Display the name of the employee and the corresponding employee ID and employee group.

• Attendance record list - Date

1) By default, the attendance record date of the day before the query date is displayed.

2) If the day's date belongs to a custom holiday, the "Holiday" icon will be displayed to the right of the date.

3) If the current day belongs to a custom public holiday, the "Off" icon will be displayed to the right of the date.

4) If today's date belongs to a customized holiday and public holiday, the "Off" and "Holiday" icons will be displayed on the right side of the date.

• Attendance - First clock on, Last clock on

1) The employee's first attendance is displayed in the first clock on, and the employee's last attendance is recorded in the last clock on. If the employee was not in attendance that day, no data will be displayed.

• Attendance - Status

1) If the employee commutes normally within the specified time during the day, the status bar will not display the mark.

2) If the employee's attendance record is normal within the specified time, no mark is displayed in the status bar.

3) If the employee leaves early at the end of the day, the status bar marks early departure.

4) If the employee is absent from the day, the absence is marked in the status bar.

5) If the employee has overtime that day, the overtime mark will be displayed in the status bar.

6) If multiple marking conditions are met at the same time, the status bar will display multiple markings at the same time.

• Attendance records list - Operate

1) You can enter the Pass management - Pass record page to view the employee's attendance details for the day.

• Search bar

1) Enter the employee name or employee ID in the search box and click the "Enter" to query the employee's attendance record.

Range search

1) Click the arrow button to the right of the search box to open the Range search interface.

Attenda	nce statistics	Q Search employe	e name / ID	•	Expo
Name	Employe E e group e	Employee name / ID	Enter employee name / ID

			Search

- The attendance status is selected as all by default. If you do not enter the date range and employee name, the default is to query the attendance data of all employees in the current month.
- Attendance status can be manually selected separately for normal, late, early leave and absent. You can also customize the input or select the date and employee name / ID for a combined query within the specified range.
- Export

1) Click the export button to download the employee attendance record form of the current query page to the local.

• Turn page

1) By default, 10 attendance records are displayed on each page. You can manually click to select 15/20/25/50/100 records.

2) You can click the previous page and next page buttons to view the record. Click the first page and the last page to jump directly to the first page or the last page to view the record. After entering numbers in the page number input box, click Jump to jump directly to this page to view the record.

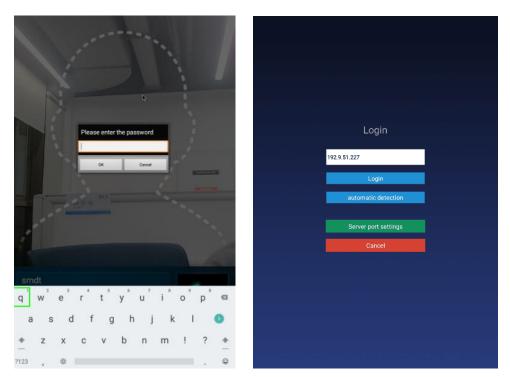

8. Chapter Eight Client Functions

8.1 Client login

• Steps:

1) After opening the application on the device, click the middle mouse button to pop up the password input box and enter the default password: 123456 to enter the settings page.

2) Click Login Management to enter the login interface. Enter the same account password as the web page to log in.

Note: You need to enter the set device password before entering the login management, after logging into the application settings and before exiting the application. The password can be set in the "Parameter setting" in the [Device management] on the backstage web page, or can be modified in the "App Password Settings" in the terminal application settings.

• Application management

After successful login, click the middle mouse button to open the [Application management] interface. The current page displays the login information: local name, local IP, connected server, current login status, and login management, application settings, face entry, application Six functions of information, pass record and face database.

• Login management

After logging in, you can click "Sign out" to log out of the current account.

8.2 Application settings

Enter the [Application settings] page, which contains the following function settings:

Smart Pass Management Platform User Manual

8.2.1 Device name setting

By default, the device name is the MAC address of the device, which can be modified manually. After being logged in, it will be synchronized to the background after modification, and can also be set in the "device details" in the [device management] of the background web page;

ک ₄	
	Device name setting
	Company name setting
	smdt
	Save

Smart Pass

8.2.2 Body temperature setting

• Body temperature detection switch

1) Control body temperature detection function. You can choose to turn on or off, the default is on.

2) On: During the identification of personnel traffic, the interface will display and broadcast the body temperature value after the face is recognized.

3) Off: During the recognition of personnel traffic, the outline of the face in the interface is automatically hidden. The interface will not detect body temperature after the face is recognized.

• Compensation temperature

1) When the ambient temperature may affect the detected body temperature, the compensation temperature can be set to adjust automatically.

2) The compensation temperature value defaults to 0.3, and the setting range is $0 \sim 1$, and a maximum of one decimal can be reserved; "compensation +" is selected by default. Example: Compensation +0.3 degrees, the problem is 36.1 during identification, then 36.4 is displayed.

• Alarm threshold

Set an alarm threshold to control body temperature detection. When the body temperature alarm is turned on, if the identified body temperature exceeds the threshold and an alarm is issued. The default is 37.3, and only numbers between 30.0 and 45.0 can be entered, and up to one decimal can be reserved.

• Body temperature alarm

1) Control body temperature alarm function. You can choose on or off, the default is on.

2) On: When the detected body temperature is higher than the threshold, the interface displays the body temperature and emits an alarm sound; if the body temperature is lower than the threshold, there will be no alarm.

3) Off: No matter the body temperature is high or low, there will be no alarm.

Mask detection

1) Control the mask detection function. You can choose to turn on or off this function, the default is off.

2) On: Recognize without wearing a mask. After recognition, the display style is a red background. Access is prohibited. Please wear a mask. The voice broadcast "Please wear a mask"; wearing a mask can be recognized normally.

3) Off: Does not detect whether a mask is worn during recognition.

8.2.3 Identification parameter setting

• Test threshold

It is used when checking the pictures into the warehouse. The higher the threshold is set, the lower the requirements on the pictures. It needs to be set reasonably. The default value is 17.

• Number of recognition

The number of times to identify whether a person is an already-entered person, the default value is 3.

• Living portrait detection

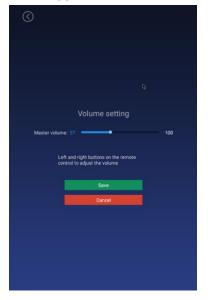

Whether to enable live detection when recognizing personnel can be set to on or off, and the default value is off.

8.2.4 Volume setting

While logged in, the volume setting of the synchronization server can also be set locally.

8.2.5 Start-up settings

• Auto-star

The application will start automatically when it is turned on, and it will not start when it is turned off.

• Application daemon

The application will automatically jump back to the playback interface within 30 seconds after opening the application page when opening, and not automatically when closing.

• Application thread guard

When the camera is turned on, an abnormality occurs and the camera restarts.

	smdt number: 1 Photos: 1 MAC: 8CFCAD064F96 Version: 2.1.0.8 IP: 192.9.50.144

8.2.7 Recognition effect display

Set the effect of face recognition, including the display when the recognition is successful (the default value displays the image) / when the recognition fails (the default value is turned on the

red light), the fill light display (the default value of the three-color light), as shown in the figure:

8.2.8 Application password settings

1) Enter the login management, enter the application settings after login, and exit the application before you need to enter the set device password, the initial password: 123456.

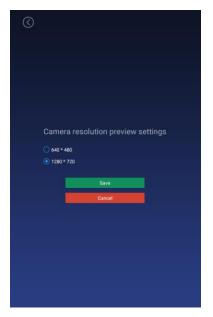

2) The password can also be set in the "Parameter Setting" of [Device Management] on the background web page.

3) Enter the original password, new password, confirm the new password, and save it to modify the password; the password length limit: 1-6 digits, can not be set to blank.

8.2.9 Camera preview resolution setting

Set the camera resolution when performing face recognition. The default value is 1280 * 720.

8.2.10 Screen-saver brightness setting

• Screen-saver

1) When face recognition is not required, a screen-saver is required. After recognizing a face, jump to the home page.

2) The app starts to display the homepage, there is a face recognition homepage within 30s, and no face recognition screen-saver within 30s.

• Screen-saver brightness setting

Adjust the brightness value displayed on the screen saver, drag the set value, and save it.

8.2.12 Relay settings

• Relay mode:

0: indicates no automatic closing mode, that is, it will not automatically close after opening the relay, the default value.

1: Indicates automatic closing mode (high effective-default low level, then high level for X seconds, and finally low level). That is, after opening the relay, a delay of X seconds will automatically close.

2: Indicates auto-close mode (active low-default low level, then high level for X seconds, and finally low level). That is, after opening the relay, a delay of X seconds will automatically close. Delay time: The default unit is 5 seconds and the maximum value is 63 seconds.

8.2.13 Others

• Upgrade firmware of temperature module

The firmware of the temperature measurement module can be manually upgraded through application settings. First insert the U disk, and then enter the temperature measurement module upgrade function of the application settings to select the firmware that can be upgraded for manual upgrade. After the upgrade, you can view the version number of the new firmware of the temperature measurement module. (The firmware file needs to be placed in the root directory of the U disk, and the file name must be updateTemp.bin

• Callback settings

1) This setting includes on and off.

2) On: You need to enter the callback address, the callback address is implemented according to the callback interface document provided by us.

3) Off: The callback function is turned off, the recognition record is not callback.

Smart Pass Management Platform User Manual

8.2.14 Application initialization

The application initialization function will clear all data in the application and restore it to its initial state, including user login information, entered face information, access records, and settings in the application settings.

8.3 Face portrait entry

You can enter personnel information locally, collect faces, enter employee ID, name, gender, and save. After the entry is successful, it will be synchronized to the background; after the face is collected, the picture will be verified and the verification result will be displayed.

8.4 Personnel import in bulk

In addition to a single entry method, you can also import personnel to the client in batches via a U disk. The import method adopts excel format and folder method. The detailed operation steps are as follows:

1. Create importVip directory with U disk.

	LOTO OO TI TTILT	~!!~
퉬 importVip	2020-03-19 11:40	文件夹
the second of the second secon	2010 04 26 10:21	→ /4- 1/

2. Put the excel file in the importVip directory, please refer to the template file for the excel template. Note that excel 2003 is used and can only exist in one excel file.

名称 ^	修改日期	类型	大小
🔒 fail	2020/4/8 19:17	文件夹	
images	2020/3/19 14:11	文件夹	
Personnel import template en.xls	2020/4/8 19:42	Microsoft Excel	28 KB

3. Create an images directory to store the face photos of the people to be imported. The photo name is the employee ID of the excel form, and the photo supports png or jpg format.

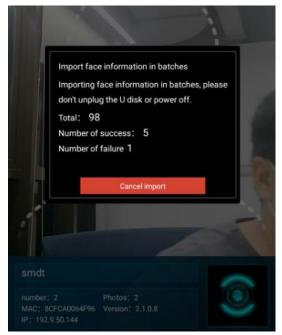

Instructions:

- 1. Personnel ID: required; cannot be repeated; and in 0-10 characters, such as 000000001
- 2. Name: required; in 0-32 characters, consisting of Chinese, English or numbers
- 3. Gender: optional; select "Male" or "Female"
- Belonging group: required; must be a group that already exists in the system; The subgroups are separated by "-", and the format is "All group-subgroups-subgroups".
 Phone number: required; cannot be repeated; Chinese phone numbers are filled in according to the length rules of domestic mobile phone numbers; Other countries' phone num
- 6. Other ID: optional; cannot be repeated; in 15 or 18 characters, and the character type is number or letter 7. Email: optional; cannot be repeated; in 0-32 characters, no limitation on character types
- IC card: optional; cannot be repeated; in 0-64 characters, no limitation on character types
 Native place: optional; in 0-64 characters, no limitation on character types
- 10. Date of Birth: optional; the format is "xxxx-xx-xx", and not possible to enter a future date 11. Address: optional, in 0-128 characters, no limitation on the character types
- 12. Notes: optional, in 0-128 characters, no limitation on the character types

4. Insert the USB port of the device after it is created and import it automatically. The current total number of imported people, successful people and failed people will be displayed.

5. After the import is completed, a fail folder will be created under the importVip directory, and a description of the reason for the import failure will be generated.

8.5 Pass records

By default, the travel records of the current day are displayed, and the data of the travel records can be queried and exported by day (the data of the current day is displayed by default, and the export record needs to be inserted into a U disk). The name, identity, time of passage, temperature and snapshot of the passage will be displayed.

8.6 Application information

Display application and terminal system related information, as shown below:

8.7 Face database

The face database page can view the face database information of the current device. The list will display the name, identity, expiration date, type and pictures. Records can be deleted, and local personnel can also be uploaded to the background.

8.8 Identify the home page

• Homepage description

Smart Pass

1) The top information bar: The time information bar will automatically synchronize the server time and day of the week.

2) Camera screen: The camera screen is displayed in full screen, and the recognition result is displayed when passing through.

3) The bottom information bar: The company name, number of people, photo, MAC address, IP address and version number will be displayed.

1. Company name: The default is to set the company name, which can be set through the background.

2. Number of people and photo information: The number of people refers to the total number of people in the device, and the number of photos is the number entered in the face database, which changes automatically after synchronizing data.

3. MAC address: It is the mac address information of the current device.

4. Version number: the current version number of the client.

5. IP address: It is the current IP of the client. If there is no address, the display is blank, and the address needs to be displayed dynamically.

• Pass recognition

It can be identified based on the person's identity. You can also check the body temperature of the identified person, whether to wear a mask, and display the identification results.

8.9 Others

• Person & Paper Comparison

The client accesses the ID card to identify the peripherals, and the device ID is set to "Person & Paper comparison". Swipe the ID card on the peripheral device. When the ID card matches the currently recognized person, the gate will be opened.

• Client languages

The English version has been adapted. After exiting the client, the system language is set to English, and the interface automatically changes to the English version after entering the

application.

9.0 Wiring Diagram

• External Card Reader

For an external card reader, the D0/D1 and GND from the reader attach to the Weigand IN on the TDT-8, the D0/D1 and GND to the controller connects to the Weigand OUT on the TDT-8.

The circuit will close on a passed temperature scan and/or facial recognition admittance depending on the settings of the device. At that time, the card reader is 'active' (a card can be presented for access) for the duration of the relay timer. The default is 5 which is ~ 2 seconds. The range is 1-63 which equates to 0.4 - 32 seconds.
